Ongoing PCI DSS Compliance Requirements

Maintain adherence through conducting the mandatory internal and external network vulnerability scans.

Meet your ASV needs: Reflare's strategic alliance with Dot.Bit delivers cost-effective PCI DSS ASV solutions for your technologies and teams. Our integrated training and audit offering helps you achieve your security requirements.

Who is PCI DSS ASV for?

Organisations subject to PCI DSS compliance must meet requirement 11.2, which states "Run internal and external network vulnerability scans at least quarterly and after any significant change in the network (such as new system component installations, changes in network topology, firewall rule modifications, product upgrades)".

In addition, if there are any external networks and systems involved in your PCI landscape fulfilling PCI DSS requirement 11.2.2 is mandatory - "Perform quarterly external vulnerability scans, via an Approved Scanning Vendor (ASV) approved by the Payment Card Industry Security Standards Council (PCI SSC). Perform rescans as needed, until passing scans are achieved".

How Do We Help?

Our team and partners can act as an ASV to your organisation and make sure that you meet your compliance needs.

With reasonable pricing, and ease of deployment, automatic scans are a great first line of defence against common errors and overlooked security issues. By scanning regularly, you can ensure that your organisation does not leave the proverbial back door open by accident in addition to meeting your regulatory requirements.

To reduce your worries, Reflare and Dot.Bit have come up with check-and-forget ASVs services. Keeping track of the schedule, alerting you on high-risk vulnerabilities, and guiding you through remediations, our services cover all that and more. We take ASVs off your plate so you can focus on more business-critical activities.

We ensure your scans will be done on time, every time. Should something adverse show up, we will provide the remediations to fix, and do the re-scan.

With our partnership, you will meet your certification requirements.
