

Employee Curriculum

REFLARE CERTIFIED SECURE EMPLOYEE (RCSE)

A customisable security training program for non-tech employees across the workforce.

Meet Internal and Industry Compliance Standards: Choose program bundles around your industry standard compliance requirements or build your own Awareness Training Program by selecting the individual modules that are most relevant for your staff's needs.

Fully customisable: RCSE allows training administrators to supplement the lessons with their own content. Easily reinforce your organisation's IT security messaging at the touch-points that matter most.

Upskill your first line of defense: Employee adoption is the key to IT security training - Reflare delivers the IT security training that turns on-demand training into on-the-job action.

Simple to Implement

BROWSER BASED: No requirements to install new software or buy/maintain costly servers to host training, as Reflare is entirely web-based, including the hands-on challenges. The only thing end-users need to access training is a web-connected device running a current HTML5 compatible browser.

PERSONALISED: With AI technology providing customized voiceovers, there is no need to re-record audio when your policies or organisation changes. Audio updates can be done in less than a minute, in-house, for no additional charge. With the click of a button, trainees will see and hear updates instantly.
