

NIST 800-50 IT Security Compliant Training Curriculum

REFLARE CERTIFIED SECURE EMPLOYEE (RCSE)

NIST 800-50 compliant IT security awareness training for the non-tech workforce.

Meet Internal and Industry Compliance Standards: RCSE NIST ensures authorised users, private contractors and employees, regardless of their prior technical knowledge, are quickly upskilled in the fundamentals of infosec while meeting NIST 800-50 compliance training requirements.

Fully Customisable: RCSE allows training administrators to supplement the lessons with their own content. Deliver your organisation's message when it matters most with consistency and ease.

Token or Bundle Pricing: One token = one lesson, and each lesson is the same price. Select the NIST bundle or individually select specific modules to maintain control over your IT security training spend.

Simple to Implement

BROWSER BASED: No requirements to install new software, as Reflare trainings runs completely in the browser. All that is required is an internet connection and a recent HTML5 compatible browser.

PERSONALISED: With AI technology providing customised voiceover to your material, there is no need to re-record audio when your organisation changes. Audio updates be done in less than a minute, in-house, for no additional charge. With the click of a button, your changes are rolled out on scale; your trainees will see the supplemented contents instantly.
